Summary

Software and Cloud Engineer with strong experience in data driven applications, operational analytics, and automation across ecommerce, AI, and retail environments. Skilled in Python, SQL, backend engineering, and data systems, with hands on experience in forecasting support, workflow automation, experimentation systems, and AI powered platforms. Proven ability to transform raw operational and customer data into actionable insights, tools, and scalable systems that improve decision making, efficiency, and business performance in fast paced environments.

Work Experience

AI Data Quality Reviewer & Evaluator

April 2026 – Present

APPEN (Upwork Contract)

- Review and validate multilingual speech transcription and annotation datasets supporting AI, NLP, and speech recognition systems.
- Perform structured quality assurance for speaker segmentation, timestamp alignment, and transcription accuracy across AI data pipelines.
- Support AI/LLM training workflows through data validation, quality analysis, and compliance with annotation standards.
- Identify inconsistencies and data quality issues to improve model reliability, accuracy, and performance in production datasets.

Full-Stack Engineer

December 2024 – Present

EMALI(Co-Founder,Remote)

- Designed and deployed a cloud-native ecommerce platform integrating secure payment systems and AI-powered product search, improving product discovery and user experience.
- Built backend systems and REST APIs using Python, TypeScript, and Node.js to support scalable ecommerce and AI-driven services.
- Implemented CI/CD pipelines, containerized deployments, and automated workflows for reliable production releases.
- Developed AI-powered features using PyTorch, Tensor Flow, and Hugging Face models for intelligent product recommendations and search optimization.
- Built and tested authentication workflows, file handling systems, and technical validation pipelines to ensure data integrity, security, reproducibility, and reliable AI model inference across distributed cloud systems.

Software Engineer

May 2023 – May 2024

ELLOE AI, SAN MATEO, CALIFORNIA, UNITED STATES (Contract)

- Developed LLM-powered AI systems for conversational platforms using Vertex AI and Hugging Face models across web and messaging channels.
- Implemented MLOps workflows for AI model deployment, monitoring, versioning, and inference optimization to improve reliability, scalability, and operational efficiency of AI services.
- Built and maintained MLOps pipelines for model deployment, monitoring, and performance optimization.
- Collaborated on production grade cloud systems using Docker, Kubernetes, and CI/CD pipelines in multi-cloud environments.

- Evaluated AI generated outputs and implemented QA workflows to improve response accuracy, consistency, and reliability.
- Translated user intent into structured workflows, improving automation and system decision accuracy in AI agent pipelines.

Product Manager

Jan 2019 – Dec 2022

CHANDARA FOODPLUS LTD, NAIROBI KENYA

- Utilized ERP and retail POS systems to analyze sales trends, monitor inventory movement, and identify operational inefficiencies, enabling data driven decision making across retail operations.
- Analyzed operational and sales data to identify inefficiencies, improve stock planning, and support forecasting of inventory demand.
- Worked with cross-functional teams to optimize supply chain workflows and improve product availability using data insights.
- Supported customer segmentation and loyalty initiatives that improved retention and increased sales performance.
- Generated operational reports and dashboards to improve visibility into sales performance, inventory flow, and retail operations.
- Monitored KPIs including sales trends, cross-selling performance, and product demand patterns to support business planning.

Education

Bachelor of Science in Mathematics and Computer Science

September 2014 – November 2018

TAITA TAVETA UNIVERSITY, VOI, KENYA

Software Engineering Boot Camp in Software Engineering

February 2022 – April 2023

ALX-AFRICA, NAIROBI, KENYA

Additional Skills

Data & Analytics: SQL, PostgreSQL, Python (pandas, data analysis), data modeling, reporting, dashboarding, exploratory data analysis, forecasting, KPI tracking, operational analytics, experimentation (A/B testing)

Cloud & Data Infrastructure: AWS, GCP, VPC, IAM, Infrastructure as Code, Docker, Kubernetes, EKS

Automation & MLOps: Terraform, CI/CD (GitHub Actions, Jenkins), workflow automation, ML deployment pipelines, model monitoring

Systems & Backend Development: Linux, networking (TCP/IP, DNS, VPN, SSL/TLS), REST APIs, NodeJS, TypeScript, FastAPI, ExpressJS

Data Tools & Observability: Prometheus, Grafana, CloudWatch, Splunk, Datadog

Business & Product Skills: forecasting, experimentation (A/B testing), operational analytics, ecommerce data systems, KPI tracking

Certifications

- Kubernetes and Cloud Native Essential - Cloud Native Computing Foundation (March 2025)
- Google Cloud Developer Expert - Google (June 2023)
- AWS Certified Cloud Practitioner - AWS (July 2022)

Languages

- English
- Swahili
